| Total Net Assets - 100.00\% |  |  |  | 6,329,434 |
| (1) Statement on Financial Accounting Standard No. 157 "Fair Value Measurements" - Various inputs are used in determining the value of the Fund's investments. <br> These inputs are summarized in the three broad levels listed below. <br> - Level 1 - quoted prices in active markets for identical securities <br> - Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.) <br> - Level 3 - significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments) |  |  |  |  |
|  |  |  |  |  |  |  |  |  |
| The following is a summary of the inputs used as of March 31, 2021 in valuing the Fund's assets carried at fair value: |  |  |  |  |
| Valuation Inputs | Investments in Securities |  | Other Financial Instruments |  |
| Level 1 - Quoted Prices | \$ | 6,276,363 | \$ |  |
| Level 2 - Other Significant Observable Inputs |  | - |  |  |
| Level 3 - Significant Unobservable Inputs |  | - |  |  |
| Total | \$ | 6,276,363 | \$ |  |

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For example, short-term debt instruments and repurchase agreements with a maturity of less than 60 days are valued using amortized cost, in accordance with rules under the Investment Company Act of 1940 . Generally, amortized cost approximates the current fair value of a security, but since the value is not obtained from a quoted price in an active market, such securities are reflected as Level 2.
(2) Represents non-income producing securities.
(3) Variable rate security; the coupon rate shown represents the yield at March 31, 2021
